

**OPERATIONAL SERVICES**

**Provision of Classroom Space to NSSED Programs**

It shall be the policy of District 106, as a member of the Northern Suburban Special Education District (NSSED), to meet its responsibility to make available the District's proportionate share of classrooms for multi-district NSSED special education classrooms.

The District shall also make every effort to maintain classes in the same school location from year to year and to maintain a grade level continuum that enables special education students to progress through the grades in the same grade groupings offered to non-special education students in the District.

Therefore, the District 106 Board of Education directs the District administration, after district space needs are met, to give first consideration to NSSED programs for the use of any available classroom space in order that the District makes available its proportionate share of appropriate space. The District shall also consider NSSED program needs and its obligation to make its proportionate share of classrooms available when planning future space needs.
